Hi, I am a Frontend Developer with **7+ years** of experience building responsive, user-friendly web and mobile applications. I specialize in creating clean, visually engaging interfaces that deliver smooth user experiences. With a strong eye for design and detail, I combine creativity and technical skill to develop products that are both beautiful and high-performing. Skilled in React, Flutter, Vue, WordPress, and modern frontend technologies. Passionate about clean code, UI/UX, and continuous learning. Currently expanding into Fullstack development with 6 months hands-on experience in Node.js, MongoDB, and building backend APIs. Passionate about end-to-end product delivery.

Experience

Frontend Developer
Park N Parcel

January 2019 - March 2025
Singapore - Remote

- Developed and maintained internal web dashboards and mobile applications used by over 4 internal departments.
- Translated UI/UX designs into responsive, high-quality code across desktop, tablet, and mobile platforms.
- Collaborated with designers, backend developers, and product teams to deliver cohesive, user-centered features.
- Improved frontend performance and consistency by refactoring legacy code and introducing reusable components, leading to faster feature delivery and reduced bugs.
- Participated in design reviews and sprint planning to ensure smooth integration of frontend tasks with team workflows.
- Identified and resolved interface bugs, ensuring a stable and seamless user experience.
- Documented frontend workflows and best practices to support future development and onboarding.

Achievements

- Contributed to the successful launch of several internal tools used daily by 50+ operations and customer service staff.
- Helped establish a consistent design language across web and mobile platforms through close collaboration with design teams.
- Maintained a reliable and scalable codebase, which enabled the team to roll out new features every sprint with minimal regressions.

Frontend Web Developer
Anywhr

January 2018 - December 2018
Singapore - Remote

- Built and supported a web-based travel planning platform used by hundreds of monthly users, focusing on performance, accessibility, and user engagement.
- Implemented responsive layouts and UI components based on design mockups, ensuring consistency across browsers and devices.
- Worked closely with designers and backend developers to deliver weekly feature updates and maintain long-term product stability.
- Refined user flows and visual elements to enhance usability and reduce friction in the booking process.

Achievements

- Strengthened interface responsiveness and visual alignment, resulting in a more consistent user experience across mobile and desktop platforms.
- Played a key role in maintaining a stable frontend foundation that supported seamless onboarding for new users and travel planners.

Frontend Web Developer
MiniBigPixel

- Developed and delivered 10+ custom websites and web applications for clients across various industries, ensuring alignment with project goals and deadlines.
- Transformed UI/UX designs into clean, responsive, and accessible interfaces across desktop and mobile platforms, enhancing usability for end-users.
- Collaborated with designers, backend developers, and project managers on cross-functional teams to ensure consistency in design and functionality.
- Maintained project documentation and participated in client requirement sessions, contributing to smoother handoffs and clearer implementation paths.
- Applied frontend best practices to optimize performance, reduce technical debt, and ensure reusable, scalable code across multiple projects.

Achievements

- Successfully launched several client-facing products on time, resulting in positive feedback and repeat business for the agency.
- Improved development efficiency by introducing modular CSS structures and reusable components, which reduced frontend coding time by an estimated 20–40% on recurring layouts.

Project Manager
Dreamsmart Solutions

May 2017 - October 2018
Batam

- Promoted to lead the frontend team and manage project execution for 20+ web-based solutions, including static sites and CMS-based builds (WordPress).
- Coordinated tasks across design and development teams, ensuring on-time delivery and adherence to project scope and quality standards.
- Managed client communications, requirements gathering, and technical scoping for small-to-mid-sized business websites.
- Supervised the development and launch of marketing websites and landing pages without backend functionality, focusing on performance and visual fidelity.

Achievements

- Successfully led the delivery of 20+ static and WordPress-based websites, meeting all timeline and quality expectations.
- Improved overall team workflow by introducing structured task planning, resulting in smoother handoffs and fewer revision cycles.
- Built stronger client relationships through effective communication and reliable delivery, contributing to repeat project opportunities for the company.

Frontend Web Developer
Dreamsmart Solutions

May 2016 - April 2017
Batam

- Developed responsive websites and custom frontend solutions for 10+ client projects using HTML, CSS, JavaScript, and WordPress.

- Collaborated with UI/UX designers and backend developers to deliver visually consistent and high-performing interfaces.
- Built reusable components and maintained frontend codebases to support shorter development cycles and easier maintenance across multiple projects.

Achievements

- Successfully delivered client-facing websites across various industries, improving site engagement through better usability and performance.
- Streamlined frontend development by introducing modular CSS structures and reusable design components, reducing repetitive coding tasks and improving delivery speed by up to 25%.

Education

STMIK Amikom Yogyakarta
Bachelor of Computer Science   Yogyakarta, 2012 - 2016

Skill

Web Development	:	HTML, CSS, SCSS, JavaScript, TypeScript, jQuery
Frontend	:	React, React Native, Flutter, Angular, Vue
Mobile	:	Flutter, React Native
Backend	:	Node.js, Express, MongoDB
CMS & Website Builders	:	WordPress, Elementor, Custom Themes, Plugin Integration
UI/UX Implementation	:	Responsive Design, Cross-Browser Compatibility, Component-Based Architecture
Version Control & Tools	:	Git, GitHub, Bitbucket
Soft skills	:	Communication, Problem-Solving, Creativity, Attention to Detail, Team Collaboration, Time Management, Adaptability
